## CYBERCOIN

Here at Cyber, we are using smart chain technology to introduce an upgrade to cryptocurrency as we know it. Using manual burns kept in check by the community as well as a charitable transaction fee, **CyberCoin** ensures a safe border from inflation.

We are an inclusive community whose goals are not confined to the uprising of a new cryptocurrency, but reach further to make the whole world a better place through charitable donations to schools and hospitals as well as countries in need. This is achieved through a 5% fee 71% of which is extracted from BNB and donated to various charities that are voted on in our community charity polls.

Today mostly due to our philanthropic and security orientated roots a diverse range of investors have joined our cause, building a great community that has a say in every next decision we make.

# OUR FUNDAMENTALS

## COMMUNITY

Above everything, we care about the sustainability and growth of our community. Without our community, there is no **CyberCoin** and we take pride in each and every one of our members. That is why we hold our community close to heart, and let them be a part of what Cybercoin becomes.

## SECURITY

At **CyberCoin** we make it a high priority to ensure the security and sustainability of our community and coin. We believe this to be such an important aspect of our coin we named our currency on the word "cyber" relating to the certainty of computers, information technology, and virtual reality. We are determined to a long-term vision and are willing to accept the future and adaptation of decentralized finance and blockchain technology.

## PHILANTHROPY

We believe that giving and benevolence should be a massive part of humanity, so we have dedicated the majority of our transaction fee to charity. We are constantly modifying our various charities that the community vote on to follow humanity's needs. As the famous saying goes "The best philanthropy is constantly in search of the finalities".

## CYBERCOIN ECOSYSTEM

**CyberCoin** (\$CYBR) is a BEP20 coin constructed on the Binance smart chain. It has a deflationary supply of 100,000,000 tokens, but as we do community chosen manual burns, portions of this amount will be burnt until we reach a finite supply of 75,000,000.

## PANCAKE SWAP

PancakeSwap is a Binance Smart Chain-based DEX. You can copy the token address of **CyberCoin** into pancake swap and transfer BNB Smart Chain to **CyberCoin**. **CyberCoin** is available on many wallet apps such as Trust Wallet and MetaMask.

## BINANCE SMART CHAIN

Binance Smart Chain (BSC) is best described as a blockchain that runs in parallel to the Binance Chain. It has often been regarded as a competitor to the Ethereum smart chain but in recent weeks the Binance smart chain has over taken the Etheruem smart chain so we decided to host our coin on Binance smart chain.

## CYBERCOIN FEE

**5 PERCENT**

There is a 5% fee every time there is a transaction using CyberCoin. 71% of this fee is given to charity and the rest towards the development of the coin. Token holders may not evade the fee or claim any specific use of the fee from CyberCoin team members.

## WHAT CHARITIES?

Every 3 weeks from the launch we give 71% of the **CyberCoins** earnt from the fee to the community charity of choice. We do the polls for the charities on our discord.

## MANUAL BURNS

Every 3 weeks we manually burn tokens. The quantity burnt is voted on the by the community in the discord server. These manual burns will stop when we reach 25 million burnt tokens. Manual burns ensure the scarcity and value of our coins.

# CYBERCOIN TOKENOMICS

## NO MAJORITY OWNERSHIP

To avoid Whales dumping heavy amounts of CyberCoin there is a max amount of tokens per wallet (5,000,000).

This includes devs and ensures that it cannot be rug pulled by anyone.

## FINITE SUPPLY

There are only 100m CyberCoins in circulation which is less than Ether, XRP, and BNB. This capped supply makes CyberCoin resistant to inflation and due to manual burns , your tokens are constantly increasing in scarcity.
